

Krishna Kumar Jha

+91 8017605078 krishnajha2004@gmail.com [LinkedIn](#) [Github](#)

Technical Skills

Languages: Python, Java, C++, Javascript

Backend: Java, Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, REST APIs

Frontend: HTML, CSS, Tailwind, Angular

Clouds & Databases: Docker, Kubernetes, AWS, PostgreSQL, MongoDB

Developer Tools: Postman, Maven, Gradle, GitHub Actions

Projects

Seal and Signature Detection System— Python, YOLOv8, Streamlit, OpenCV

[Source Code](#)

- Engineered a document intelligence system for automated detection of handwritten signatures and official seals using YOLOv8, achieving 97.1% mAP@50 on 4,902 annotated document images.
- Designed and implemented a synthetic document generation pipeline producing 3,000 realistic training samples to improve model generalization across diverse document layouts.
- Built and deployed an end-to-end computer vision inference platform achieving 95.4% precision and 92.6% recall through a Streamlit-based web application.

DevFlow—Java, Spring Boot, PostgreSQL, Redis, Docker

[Source Code](#)

- Developed a workflow automation platform featuring JWT authentication, Role-Based Access Control (RBAC), project management, task tracking, and team collaboration modules.
- Designed and implemented 15+ RESTful APIs using Spring Boot with layered architecture, exception handling, validation, and Redis caching.
- Containerized the application using Docker and Docker Compose while enabling scalable deployment and project analytics capabilities.

Work Experience

CodSoft

May 2024 – July 2024

Machine Learning Intern, Remote

- Developed and deployed a Heart Disease Prediction Dashboard using Scikit-Learn, Pandas, and Streamlit, enabling real-time cardiovascular risk assessment from patient health metrics.
- Performed data preprocessing, feature scaling, exploratory data analysis, and supervised model training on healthcare datasets to improve prediction reliability.
- Integrated trained machine learning models into an interactive web application, supporting end-to-end inference workflows and user-driven predictions.

Education

Lovely Professional University, Jalandhar

2022 – 2026

B.Tech in Computer Science & Engineering

7.3/10 CGPA

H.M. Education Center

2020 – 2022

Higher Secondary Education

81%

Certificates

- Dynamic Programming, Greedy Algorithms by University of Colorado Boulder — Coursera 2025
- The Bits and Bytes of Networking—Coursera 2024

Achievements

- Solved 250+ DSA questions on Leetcode.
- Selected among the qualifying teams in the Infineon Hackathon and developed an adaptive decision-making solution under competitive constraints.
